### 17 - THE COURSE: Please comment on course content, requirement or any other aspect of the course.

Response Rate	2/10 (20%)
<ul style="list-style-type: none"><li>• This course is very helpful for someone like me who has no prior knowledge when it came to coding. The course does through you right into it to start, but you learn to keep up, this course may seem difficult that is only being you need to practice quite a bit to full understand coding.</li><li>• Computer science is very hard, but is interesting once you get an understanding on how to do it. I wish that I enjoyed and was better at it because I think it is a good and marketable skill. But, unfortunately my brain is not wired that way. I think I did relatively well overall.</li></ul>	

### 18 - THE INSTRUCTOR: Please comment on the strengths and weaknesses of Supraja Gurajala. Would you take another course from this instructor? -

Response Rate	3/10 (30%)
<ul style="list-style-type: none"><li>• She is always available to help outside of class and she responds fairly quickly. She goes into the fine detail of the program when explaining it making it easier to understand. The only thing I would say is giving more examples in class. Maybe ones where the class comes up with a type of program or chooses one from a list given and the whole class has to figure out how to write the program.</li><li>• Professor Gurajala is very helpful and was always available outside of class, especially with the COVID situation. I would take another class with her if I wasn't bad at comsci. Her weekly schedule for us during COVID was a good amount of workload.</li><li>• I would definitely take another course with you professor, I'm sorry I didn't end the semester as strong like I planned during the beginning of the semester, thank you and have a great summer.</li></ul>
