

Database quiz

Write the following queries, based on the database schema

Product(maker, model, type)

PC(model, speed, ram, hd, price)

Laptop(model, speed, ram, hd, screen, price)

Printer(model, color, type, price)

You should use at least one subquery in each of your answers and write each query in two significantly different ways (e.g., using different sets of the operators EXISTS, IN, ALL, and ANY).

a. Find the makers of PC's with a speed of at least 3.0.

b. Find the printers with the highest price.
