<ul style="list-style-type: none"><li>I really enjoyed the content contained in the course. Sure we stayed in regression for a very long time, but it was worth it because not only did we learn the algorithms behind regression prediction, but we also learned how to avoid over fitting, adding bias, lowering variance, lambda terms, L2, L1, and a million other amazing things. This class really encouraged me to look into a bunch of different subjects, and knowing the math behind things was incredibly useful for researching topics to talk about. Overall, the class was worth it and I know that when applying to grad school, it will be a good reason to pick me in a data science program :) woot woot</li></ul>
